

SolarMonkey

The **Solarmonkey** is here and ready to provide you with power - directly from the sun! The **Solarmonkey** can be connected directly to your phone, iPod, PDA, PSP and more, enabling you to recharge without the need for batteries or a main power supply!

Get free play from your iPod - wherever you are. The **Solarmonkey** will also work under incandescent lights such as a table lamp with no need for batteries or main chargers.

The **Solarmonkey** comes with tips for the most popular makes of mobile phones and devices: Nokia & Mini Nokia, Motorola V66, Samsung E900, LG Chocolate, Sony Ericsson Wide connector, Mini USB, Femal USB charging tip, iPod connector, DC4.0 for Sony PSP.

Specially designed to work with the **Solarmonkey**, the new **Solarnut** reserves redundant solar energy so that if a sunny day turns cloudy while you're using your **Solarmonkey**, charging of your device is not affected.

Solarnut can also be used as a stand alone emergency charger, providing you with up to a quarter of mobile phone power or at least 15 minutes of talk time. To make the most of your **Solarnut**, recharge it (via **Solarmonkey**) at least once every 2-3 months!

So now there really will be sunshine on a rainy day!
