\$299.99

The **7'** high solar powered traditional styled lamp posts come with **3** lights which use a special patented cone reflector to make the light brighter.

Model # **GS-94T**

\$379.99

The LED lights use a special patented cone reflector to make the light brighter in each of our solar lamp posts. The gas-light design of our solar lamp lights is classic and adds an elegant appeal to your front or back yard.

Using efficient solar-powered technology, the solar lamp lights receive their energy from built-in batteries charged daily by the sun, which in turn light the super-bright LED bulbs. Each solar lamp post has real beveled glass panes that add to the late 19th Century appeal. No maintenance is required with the powder-coated cast-aluminum solar lamp posts that are weather resistant & won't rust. Worry-free, the solar lamp post turns on automatically at dusk and off at dawn. The solar lamp post can be bolted down (bolts included) and is available in either black or rust red.

Also Available
